Forwarded under separate cover is an interesting transcript monitored by CATOMIC/3 on the CAVOICE audio device. The principals are and his wife and the transcript includes a long argument between them during which Subject is rather severely berated by his wife for a long list of grievances. 2. The transcript contains a wealth of information on the local Soviet colony as a result of Subject's wife's comments on the careers, positions, prerogatives and privileges of Subject's colleagues in comparison to his own. 3. The transcript should prove useful to in the event Subject later receives an in-depth assessment by that unit. In the meantime, we are forwarding an additional copy of the transcript for which can sanitize it and make whatever use of it which may be appropriate. We feel it provides a useful example of the type of operational information sometimes collected from audio operations directed against private residences. Attachment: Transcript u.s.c.
